

Cut Training Costs & Time without Cutting Corners

Get your workforce job-ready faster with Australia's only combined HV Operator Refresher + GWO BST Refresher - delivered in just 4 days

RelyOn
Australia

No other provider can match our efficiency, quality, and compliance

Why Choose RelyOn?

- Only RTO in Australia offering bundled HV Operator Refresher + GWO BST Refresher
- Delivered onsite, anywhere in Australia - no extra travel or time off work
- 3 days in the classroom vs traditional 4+ days - save time AND money
- Theory completed online prior to face-to-face practicals
- Statement of Attainment + WINDA Certificates on successful completion

Proven Cost & Time Savings:

Traditional Training:

Separate HV + GWO BST courses, multiple days off work, multiple bookings

With RelyOn:

Single booking, combined delivery, reduced downtime, reduced costs

Results that Matter:

Our adaptive digital learning platform personalises content based on knowledge gaps, ensuring better retention and improved safety outcomes - all while cutting down theory time in the classroom.

Adaptive Learning

Adaptive learning provides a more personalized learning experience by adjusting the content, pace, and support based on each learner's needs in real time. Here's how it works:

- 1 Assesses Your Knowledge Continuously**
It starts by gauging what you already know and updates that understanding as you progress. This prevents repeating content you've mastered or skipping over what you haven't.
 - 2 Adjusts the Pace**
If you grasp something quickly, it moves you forward. If you're struggling, it slows down, offers extra practice, or presents the material in a different way.
 - 3 Targets Learning Gaps**
Instead of a one-size-fits-all path, it identifies where you're getting stuck and focuses on strengthening those specific areas.
 - 4 Learner-Centric Experience**
The system responds to your learning style, pace, and performance—making the experience feel supportive rather than pressuring.
 - 5 Data-Driven Feedback**
It provides insights and recommendations based on your progress, helping you stay on track and see measurable growth.
- In short, adaptive learning meets you where you are and helps you grow at your own speed - making learning more efficient, engaging, and human.

What's Included?

Our flipped classroom model combines **adaptive digital theory learning with on-site practical assessments.**
